What they say they want:

- A game.
- A Home Page.
- A how to play section.
- A review Page.

What they need:

- A responsive website that allows the user to play a game on a laptop or desktop computer.
- A navigation bar that allows the users to navigate the website easy that will be fully responsive.
- A Home Page with details on the developer, details on the game, a how to play section and a patch section showing future content and patched made to the game.
- A Game Page that is separate to the home page, so the users don't get confused with too much information being on one page.
- A Comments Page that will allow the users to comment on the game on what future features they would like to see as well as leave review.

What they don't know they need:

- A store section that could be added in the future with things that the users could buy to help make their experience with the game more enjoyable, such as new skins for the character.
- A forum section that could be added in the future where other players can interact with each other and talk about the game.
- A leader board so that players can compete to get the high score.
- A reward section where players can get rewards for setting high score and unlock new features for the game.
